# **A G Rees, Rhos Farm, Efailwen.**

## **Foreword**

After much heart searching Adrian Rees has decided to embark on a new adventure milking cows in New Zealand.

Consequently the entire dairy herd and summer calving heifers are being sold within and the remaining youngstock to be dispersed over the coming winter.

Developed from carefully selected purchases from good herds bred to the most suitable AI sires a sound bodied productive milker is found throughout. With emphasis on economic milk production cows graze for as long as possible starting with low yielders in February. High yielders follow as soon as the weather allows being topped up with a buffer feed and limited parlour concentrates until safely incalf. Yields seen within have been produced primarily from grazed grass with all animals looking fit and productive.

**Milk Quality**                      3.97% Butterfat                      3.48% Protein    160 Cells    19 TBC

**Health Status** – Vaccinated for BVD, September 2016  
IBR, 23/05/2017

**CPH No:** 55/024/0233

**Service details:**                      Lots 1-73 Not served. Remainder with service dates given. The low yielders have ran with a Holstein Friesian bull to sale date and heifers with a Jersey bull to sale date.

**CATALOGUE OF SALE TO COMMENCE AT 10.30AM**
